

# SMART Pop Quiz

1. The above object is a

- Motor with a digital drive
- Motor and drive with smart controller
- A master-capable motion controller on a drive and motor

2. Using the SMART will help you

- A. Save on cabling costs
- B. Reduce design time
- C. Eliminate control cabinets
- D. Get you to market faster
- E. All of the above

3. There are 64 SmartMotors connected over CAN. How many of those SmartMotors could be master to the other 63 SmartMotors?

## PRODUCTS

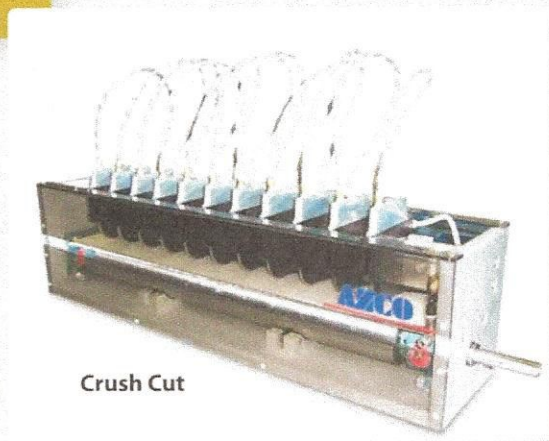

### Slitters

THE Acu-Slit slitter comes in online and cut-to-length configurations. The multipurpose, rotary device features a solid, hardened anvil, and blade materials are through-hardened D-2 steel. Both units have precision bearings to handle high load forces, as well as precision machined-steel side frame plates. The unit mounts on any production line and performs a variety of tasks from simple slitting to motorized slitter that cut dense materials.

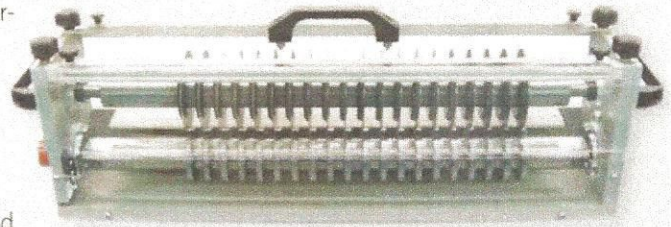

Shear-cut slitters provide precise cuts on flexible materials and have the longest blade life.

Crush-cut slitters cut thicker, low-density materials such as filter media and nonwovens.

## COATINGS

**To enhance product performance**

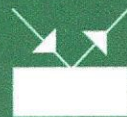

Donwell Company is a licensed DuPont applicator for all TEFLON® Coatings. These coatings can improve the performance of your parts by providing them with one or more beneficial properties.

Low coefficient of friction

Chemical resistance

Non-stick

We coat both small and large parts to close tolerances in quantities from 1 to 1,000,000. Call Donwell for custom TEFLON® coating services to meet your specifications.
