Tubing Cutter

[AZCO Corp.](#)

[LISTED UNDER: Converting Equipment|Tubing-Processing Equipment](#)

[08/28/2014 - 9:48am](#)

Our bench top tubing cutter is ideal for your tube processing. The tubing is indexed by a dual driver tractor belt system for high accuracy. For easy operator use, the stepper drive is controlled by the color touch screen; simply enter the length and number of pieces. It is ideal for the tubing material to have a diameter of up to 25 mm/1" and a length between 0.25 mm/0.01" to 25 m/999". All stainless steel covers with a lexan guard include a safety interlock. Blades are disposable and are easy to change without the need for tools. Plugs into a 110 V AC and requires 40 psi compressed air.
